

## CARBURETTOR CLEANER

### Throttle body safe fuel residue cleaner.

- Improves air fuel flow.
  - Reduces fuel consumption.
- Smoother engine performance.
  - Improved engine output.
- Outstanding cleaning capacity due to special surface reaction.
  - Optimum carburettor performance.
  - Loosens and removes even the most stubborn deposits.
  - Perfect throttle function.

### Characteristics:

Highly active system cleaner for the removal of contaminants and deposits in the intake and throttle area without any disassembly, as well as for calibrated bore holes and nozzles. Outstanding dissolving power for oil, grease, resin and paint residue.

### Instructions for Use:

With the engine turned off, generously spray the parts to be cleaned and allow the active ingredient to react 2-3 minutes. Then start the engine and spray for about 30 seconds into the intake and throttle area and, while doing so, slightly increase the engine speed in order to burn off dissolved deposits.

### Note:

With certain throttle units it may be advantageous to disassemble them, in order to thoroughly clean the underside of the throttle, as well.

**Suitable for petrol/LPG engines only.**
